

With over 30 years experience providing Radiation Protection Advice, IRS is your one-stop solution to all your radiation protection needs.

When it comes to Radiation Protection IRS has always endeavoured to ensure that continuing education and training after qualification is provided.

IRS Ltd holds a range of courses throughout the year and is always striving to be at the forefront of radiation protection training.

Service specification:

IRS organises various courses each year in line with European Basic Safety Standards and Medical Exposures Directives. Course material consists of quality assurance and radiation protection topics.

Courses which have been organised by IRS include:

- Radiation Protection Supervisors Course – endorsed by the College of Radiographers
- Quality Assurance in Radiation Protection – endorsed by the College of Radiographers
- Radiation Protection Supervisor's in Colleges of Further Education.
- Laser Safety Course – endorsed by the Royal College of Nursing
- Magnetic Resonance Course
- Digital Imaging in Radiography
- Risk Courses in association with Keele University
- Private Courses on relevant topics of interest to our many clients
- Ad hoc courses as required for nurses, physiotherapists, dentists, universities.

IRS has organised education and training courses in radiation protection and quality assurance throughout Europe on behalf of the Commission of the European Communities through the European Radiation Protection Education and Training (ERPET) programme. To date IRS has organised courses in France, Germany, Italy and Spain.
